26 Dec- 8th Jan 2007

Sales Assistant/ Warehouse Assistant

Next

The Whit gift Centre, Lewisham, London

Responsibilities

My main duties were labelling, placing tags on items that was on sale. I was responsible for making sure the store was properly organized for the customers, whilst attending to their needs. I also was an assistant in the workshop, ordering items and doing heavy lifting.

Through my work I achieved better experience with working in working in groups, and I am familiar with the general hazard procedures.

Sept 2009 - To date

BA H 3D Digital Design & Animation (Yr2)

University of Greenwich

Avery Hill Campus

Skills

During my work experience, I acquired skills in communicating and following instructions as well as operating the cash register. I obtained good listening and learning skills.

I also learnt to be able to work with my colleagues and observe them in their working environment.

I am a fast learner; I follow instructions well when under pressure. I am exceptionally hard working, trustworthy, confident, enthusiastic and I work well both in teams and as an individual.

I am a socially motivated person, I am an artist in 3D graphics and I am also a street dancer, choreographer, and performer.

I am able to use Microsoft Office packages

Able to use graphic design software e.g. 3D Studio Max, Adobe Illustrator, Adobe Photoshop, Blender.

Hobbies/ Activities

My hobbies are artistic creativity, reading, listening to music, dancing, teaching street dance, drawing and 3D graphic designing.

Cover Letter

I have a huge interest in the 3D animation industry, because I like the idea of creating and bringing motion and innovation to something that I have had a hand in making. I have produced personal outside work using 3D software's such as; Blender and 3D Studio Max and look to producing work on a wider and more professional level.

3D Animation has consistently been a growing passion of mine; I am seeking a company to propel my abilities and knowledge to be among the most prominent animators in the market. My goal is to experience a competitive working environment where I can meet and also work with professionals, in their working environment to learn from them and contribute an idea too. I prefer to multi task and add more towards a given assignment, which may involve producing visual concept sketches, 3D modeling and 3D animating.

My overall goal is to develop my skills to a professional standard, enabling me to be given the opportunity to work for such industries like; Pixar Animation, DreamWorks, Disney, Warner Bros, Sony, Nintendo etc.

It is strong animated movies like Toy Story, Final Fantasy, Finding Nemo, Transformers and many more that I have been set on adapting to a professional working environment to be able to participate in such influential movies.

Below are some of my previous 3D designs that I have produced throughout my experiences as a 3D Animator, while attending The University of Greenwich these designs were produced through the numerous projects that I have completed, involving variable assignments and creative standards.
